

Informed Consent Guide

When working with outside sources other than the University there needs to be an informed voluntary consent form that is signed by the participants. The following pieces should be included into your consent form:

- A brief statement of what the project is and where it is being conducted
- Purpose of the study
- A statement of what material will be used (ex. blood)
- How will the material be used and where it is going
- Any housing of the animal or pain caused to animal
- Duration of the project
- What will happen to the material at the conclusion of the project

If there any questions or concerns please do not hesitate to reach out.
